

SANKET ILAKE

sanket.ilake2019@gmail.com | Kolhapur, India 416234 | [7057891106](https://www.linkedin.com/in/sanket-ilake)

Summary

Future software developer with a solid foundation in Java, Spring MVC, Hibernate ORM, and Angular. Proficient in database administration, web development, and monolithic/three-tier architectures. Eager to contribute to a dynamic team and advance professionally in the tech sector, building and enhancing Finance business function applications.

Education

Masters of Computer Application

04/2025

K. I. T's Institute of Management Education & Research

Bachelor of Computer Application

06/2023

The New Collage Kolhapur

Technical Skills

Languages: Java, JavaScript, Python, SQL, Shell-Scripting | **Backend:** Spring Boot, J2EE, JPA/Hibernate, REST, JDBC
| **Frontend:** Angular, HTML, CSS | **Databases:** MySQL, RDBMS, Cassandra/Solr/NoSQL (plus) | **Tools:** Git, GitHub, JUnit, JWT

Work Experience

Code Crafters Services - Java Developer

01/2024 – 12/2024

Key Skills: Java, Spring Boot, Angular, JPA/Hibernate, REST APIs

- Developed responsive Angular interfaces with dynamic charts and secured backend systems using Spring Boot, JPA/Hibernate, and JWT-based authentication.
 - Optimized backend services and database queries, reducing response times and enhancing performance aligned with scalability and resilience requirements.
 - Designed and documented secure APIs, ensuring seamless communication between frontend and backend systems, with focus on monitoring and enhancement.
 - Contributed to the full software development lifecycle, including version control, testing, and code release, while staying abreast of emerging technologies.
-

Projects

Project Management System (Spring Boot, Angular)

| GitHub

Technologies: Spring Boot, JPA/Hibernate, Angular, JWT

- Implemented a Three-Tier Architecture Project Management System with user-friendly interfaces and robust data security.
- Secured the application using JWT-based authentication with Spring Security and Angular guards, ensuring reliable delivery and security.

Online Grocery Store (JDBC)

| GitHub

Technologies: Java, JDBC, MySQL

- Managed database connections using JDBC for efficient data retrieval and updates.
 - Secured user data with robust authentication and authorization, ensuring data integrity.
-

Achievements & Certifications

- Completed intensive certification course covering end-to-end development using Core Java, Spring Boot, Hibernate, RESTful APIs, and Angular/React.
 - Gained hands-on experience in building and deploying full-stack web applications, integrating frontend and backend components, and database handling with MySQL.
-

Extracurricular Activities

- Actively learning new technologies.
- Participating in coding communities.
